Qianshuo (Harry) Ye

Education

Department of Computer Science and Technology, University of Cambridge
MPhil in Advanced Computer Science 2026 - 2027

- **Modules:** Information, Energy and Intelligence, Introduction to Computational Semantics and Pragmatics, Machine Learning and the Physical World, Theory of Deep Learning, Principles of AI-driven Neuroscience and Translational Biomedicine

Department of Engineering, University of Cambridge
BA (Hons) and MEng in Information and Computer Engineering 2022 - 2026

- **Grades:** *First Class (BA)* and *Distinction (MEng)*
- **Relevant Modules:** Probabilistic Machine Learning, Computational Statistics and Machine Learning, Deep Learning and Structured Data, Statistical Signal and Network Models, Computer Vision, Computational Neuroscience

Research Experiences

School of Computing and Data Science, The University of Hong Kong
Research Intern Jul 2026 - Sep 2026

- **Project:** *Understanding On-Policy Distillation: A Mechanistic Interpretability Perspective via Sparse Crosscoders*, supervised by **Prof. Difan Zou**.
- Investigated feature sharing and evolution during on-policy distillation (OPD) using sparse crosscoders.
- Proposed swap readout to track feature usage across model checkpoints.
- Revealed how OPD and SFT reshape shared features, supported by causal interventions.

Machine Intelligence Lab, Department of Engineering, University of Cambridge
Undergraduate Researcher Oct 2025 - Jul 2026

- **MEng Project**: *Explainable Chart Understanding in Vision-Language Models*, supervised by **Prof. Bill Byrne**.
- Applied the relevancy map method (Chefer et al.) to examine the visual focus of Qwen3-VL in chart understanding tasks.
- Evaluated the impact of visual editing on chart images on the generated relevancy maps and model performance.

CAMEL-AI
Research Contributor Feb 2025 - Mar 2025

- Contributed to constructing verified seed data in the Advanced Physics domain for the *Loong* project (paper accepted at NeurIPS 2025 LAW Workshop) by integrating SymPy-based symbolic code generation into the LLM reasoning pipeline.
- Contributed to the multi-agent-based video understanding toolkit for the *OWL* project (paper accepted at NeurIPS 2025), integrating modality-specialised models to improve cross-modal perception.

Work Experiences

Eigent AI Remote
Software Engineer Intern and Open Source Contributor Oct 2024 - Feb 2025

- Contributed to optimising the response accuracy and contextual relevance of a retrieval-augmented generation (RAG)-based chatbot.

NetMind.AI London, UK
Software Engineer Intern Jun 2024 - Aug 2024

- Developed an AI-powered search engine featuring a contextual retrieval pipeline and applied prompt optimisation for search fidelity.

Lenovo Ltd. Shenzhen, China
Software Engineer Intern Aug 2023 - Sep 2023

- Prototyped a knowledge-based chatbot to explore RAG pipelines.

Publications and Preprints

1. **Loong: Synthesize Long Chain-of-Thoughts at Scale through Verifiers**
   Xingyue Huang*, Rishabh*, Gregor Franke*, Ziyi Yang*, Jiamu Bai, Weijie Bai, Jinhe Bi, Zifeng Ding, Yiqun Duan, Chengyu Fan, Wendong Fan, Xin Gao, Ruohao Guo, Yuan He, Zhuangzhuang He, Xianglong Hu, Neil Johnson, Bowen Li, Fangru Lin, Siyu Lin, Tong Liu, Yunpu Ma, Hao Shen, Hao Sun, Beibei Wang, Fangyijie Wang, Hao Wang, Haoran Wang, Yang Wang, Yifeng Wang, Zhaowei Wang, Ziyang Wang, Yifan Wu, Zikai Xiao, Chengxing Xie, Fan Yang, Junxiao Yang, **Qianshuo Ye**, Ziyu Ye, Guangtao Zeng, Yuwen Ebony Zhang, Zeyu Zhang, Zihao Zhu, Bernard Ghanem, Philip Torr, Guohao Li
   LAW 2025: Bridging Language, Agent, and World Models, NeurIPS Workshop, 2025.
2. **OWL: Optimized Workforce Learning for General Multi-Agent Assistance in Real-World Task Automation**
   Mengkang Hu*, Yuhang Zhou*, Wendong Fan, Yuzhou Nie, Bowei Xia, Tao Sun, Ziyu Ye, Zhaoxuan Jin, Yingru Li, Qiguang Chen, Zeyu Zhang, Yifeng Wang, **Qianshuo Ye**, Bernard Ghanem, Ping Luo, Guohao Li
   The Thirty-Ninth Annual Conference on Neural Information Processing Systems, 2025.
3. **Understanding On-Policy Distillation: A Mechanistic Interpretability Perspective via Sparse Crosscoders**
   Zichao Yu, **Qianshuo Ye**, Xu Wang, Difan Zou
   arXiv preprint arXiv:2609.35210. Under review at ICLR 2027.

Awards and Honors

- **Powrie Scholarship**, Selwyn College, University of Cambridge 2025
  Awarded to outstanding Engineering students at Selwyn College
- **Selwyn College Scholar**, Selwyn College, University of Cambridge 2023 - 2026
  Awarded for academic excellence
- **Cambridge Trust Scholar**, Cambridge Trust 2022 - 2026

Skills

Programming: Python, C++, Java, JavaScript, HTML

ML/AI Frameworks: PyTorch, JAX

Languages: English, Mandarin Chinese, French (elementary), Italian (elementary)
